Consult your owner's manual for complete installation instructions and proper clearances to combustible materials. Check all local and national building codes and gas regulations. All specifications are subject to change without prior notice due to on-going product improvements. Products may not be exactly as shown. Flame height and activity is influenced by varying vent configurations and may not appear as shown. Napoleon is a registered trademark of Wolf Steel Group Inc. EnerGuide - A Canadian efficiency standard based on frequent, short start-up and cool-down cycles. All appliances sold in Canada are subject to this EnerGuide rating system. AFUE - A US efficiency standard (Department of Energy) based on extended on/off cycles, more typical of fireplace usage. Steady State - Reflects the highest possible overall heating efficiency.

CONTROLS

eFIRE MOBILE APP: Providing a more connected and convenient experience by controlling every setting right from your mobile device. This includes: on/off, flame height and blower speed AND the ability to choose any color imaginable for the ember bed to suit your space or mood!

REMOTE: Included remote controls every function of your fireplace including; on/off, flame height and blower speed.

HEAT MANAGEMENT

DYNAMIC HEAT CONTROL (DHC): Enhance performance and lower wall temperatures. This system works without a fan for quieter operation and is perfect for situations where heat-sensitive objects, like a wall-mounted TV, need to be placed directly above the fireplace and recessed. It offers the lowest height clearances for TV or artwork installations.

DYNAMIC HEAT CONTROL PLUS (DHC+): Add this system to your DHC to move the heat to the outdoors.

DUCTED HEAT MANAGEMENT (DHM): Offers the greatest amount of flexibility for installations with multiple configurations available, including an option where you can install the fireplace as a room divider and safely pass cables through the wall for ease of electronic installation. Enjoy true zero clearance to combustible materials without fear of heat damage.

INNOVATIONS

EFFICIENT GAS FIREPLACE: With its impressive flame height, this innovative design ensures optimal heat output while operating efficiently. Napoleon recognizes the global shift towards environmentally-friendly solutions and is dedicated to offering sustainable products and practices.

DIRECT VENT: Effectively removes exhaust and fumes from your space, keeping your indoor air clean while also conserving energy.
